## Education

2018 - Current
**Financial Menagement**
School of Economics and Business

## Expertise

- Web Development with JavaScript, HTML5, CSS

- ReactJS, Next.js

- Webflow Development

## Language

**English - Advanced**

**German - Elementary**

## Experience

### CarGet

**Web Developer**

Working on the upcoming Carget project has been a rewarding and educational experience. Carget is a unique website where users will be able to buy and sell cars online.

Here you can find the preview of the project:
http://www.carget.net
http://www.carget.net/article/1

### Personal Projects

Working on personal projects for learning programming has been an incredibly rewarding experience. From creating a basic To do list to creating my website portfolio, I have been able to learn and sharpen my coding skills.

Working on projects from start to finish has allowed me to gain a better understanding of coding languages and how they can be applied to solve various problems.

My projects can be found here:
https://github.com/AdnanAvdic

### Skills

- Experience with JavaScript, ReactJS and Next.js

- Strong understanding of User Interface Design and the design process involved

- Coded websites that are responsive, ensuring that they look great and perform well on both mobile and desktop devices
